

PATTON & COOKE CLOSING TOOL

Patton & Cooke is pleased to announce that many couplers 5 - 15 kV are factory fitted with bracket assemblies to accommodate a closing tool.

WHY USE CLOSING TOOLS?

- Enable one person operation
- Reduce contact damage
- Reduce insulator tube damage
- Extend the life of contacts

The closing tool allows for quick and easy connection and disconnection by one person.

Patton & Cooke Catalogue Number	Description	For Use with P&C Coupler
C80D3018	Handle Assembly	PK & RK Series PL & RL Series
C80D3024	Handle Assembly	C80C Series C80D Series *Also used when PK/PL Series is mated with C80C/C80D Series
C150F3050	Handle Assembly	C80F Series C150F Series

Existing couplers may be retrofitted with bracket assemblies

Patton & Cooke Catalogue Number	Description	For Use with P&C Coupler
C80D3016	Bracket assembly consisting of two brackets and zinc plated mounting hardware for use on either <u> cable </u> mounted plug or receptacle. (Kit will adapt one cable end).	PK & RK Series PL & RL Series C80C Series C80D Series
C80D3017	Bracket assembly consisting of two brackets and zinc plated mounting hardware for use on either <u> equipment </u> mounted plug or receptacle. (Kit will adapt one cable end).	PK & RK Series PL & RL Series C80C Series C80D Series
C150F3049	Bracket assembly consisting of two brackets and zinc plated mounting hardware for use on either <u> cable </u> mounted plug or receptacle, or <u> equipment </u> mounted plug (Kit will adapt one cable end).	C150F Series
C150F3066	Bracket assembly consisting of two brackets and zinc plated mounting hardware for use on <u> equipment </u> mounted receptacle. (Kit will adapt one cable end)
