How to connect when speed control is not needed.

No - Color	Pin - Contents	Connection Method
1 - Black	GND	connecting to (-) power
2 - Red	12V	connecting to (+) power
3 - Yellow	1FG	No Use
4 - White	PWM	CW connecting to (-) power
5 - Orange	CW/CCW	Normal Open, CCW connecting to (-) power

* Please be cautious that Motor can be damaged when connected to incorrect power (+) (-).

- * color gear ratios are same rotation direction with motor.
- * Proceed function change in motor stop type.
- * Controller for speed control is GUN type.
